

Recombinant Human CDC42EP4 Protein, GST-Tagged

Cat. No. CDC42EP4-0949H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human CDC42EP4 full-length ORF (NP_036253.2, 1 a.a. - 356 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	Wheat Germ
Description	The product of this gene is a member of the CDC42-binding protein family. Members of this family interact with Rho family GTPases and regulate the organization of the actin cytoskeleton. This protein has been shown to bind both CDC42 and TC10 GTPases in a GTP-dependent manner. When overexpressed in fibroblasts, this protein was able to induce pseudopodia formation, which suggested a role in inducing actin filament assembly and cell shape control.
