

Recombinant Human TAZ protein, His & T7-tagged

Cat. No. TAZ-1227H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human TAZ aa. (Gly154~Arg292 (Accession # Q16635) fused with N-terminal His & T7 tag was produced in E. coli cells.
Species	Human
Source	E.coli
ProteinLength	Gly154~Arg292
Description	This gene encodes a protein that is expressed at high levels in cardiac and skeletal muscle. Mutations in this gene have been associated with a number of clinical disorders including Barth syndrome, dilated cardiomyopathy (DCM), hypertrophic DCM, endocardial fibroelastosis, and left ventricular noncompaction (LVNC). Multiple transcript variants encoding different isoforms have been described. A long form and a short form of each of these isoforms is produced; the short form lacks a hydrophobic leader sequence and may exist as a cytoplasmic protein rather than being membrane-bound. Other alternatively spliced transcripts have been described but the full-length nature of all these transcripts is not known.
Form	Freeze-dried powder
Molecular Mass	Predicted Molecular Mass: 19.6kDa.
Endotoxin	<1.0EU per 1g (determined by the LAL method)

 45-1 Ramsey Road, Shirley, NY 11967, USA

Purity	>95%
Characteristic	The isoelectric point is 9.2.
Applications	SDS-PAGE; WB; ELISA; IP.
Stability	The thermal stability is described by the loss rate of the target protein. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. (Referring from China Biological Products Standard, which was calculated by the Arrhenius equation.) The loss of this protein is less than 5% within the expiration date under appropriate storage condition.
Storage	Avoid repeated freeze/thaw cycles. Store at 2-8°C for one month. Aliquot and store at -80°C for 12 months.
Storage buffer	Supplied as lyophilized form in PBS, pH7.4, containing 5% sucrose, 0.01% sarcosyl.
Reconstitution	Reconstitute in sterile PBS, pH7.2-pH7.4.

GENE INFORMATION

Gene Name	TAZ tafazzin [Homo sapiens (human)]
Official Symbol	TAZ
Synonyms	TAZ; tafazzin; EFE; BTHS; EFE2; G4.5; Taz1; CMD3A; LVNCX; protein G4.5
Gene ID	6901
mRNA Refseq	NM_000116.4
