

## Recombinant HPIV-3 (strain NIH 47885) F (ΔTM) Protein

Cat. No. F-1821H    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                         |
|------------------|-----------------------------------------------------------------------------------------|
| Product Overview | Recombinant HPIV-3 (strain NIH 47885) F (ΔTM) Protein (P06828) was expressed in HEK293. |
| Species          | HPIV3                                                                                   |
| Source           | HEK293                                                                                  |
| Form             | PBS, pH 7.4.                                                                            |
| Purity           | >95%                                                                                    |
| Applications     | WB standard, Ab ELISA, immunogen, etc.                                                  |
| Storage          | Store at -80 centigrade, Avoid freeze / thaw cycle.                                     |
| Concentration    | 1mg/mL                                                                                  |
