

## Kit for Cell Culture Media Exosomes

**Cat. No.** Kit-2307    **Lot. No.** (See product label)

### SPECIFICATION

|                                |                                                                                                                                                                                                                                                                              |
|--------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b>        | Exosome isolation from biofluids or cell culture media and FACS analysis of exosome markers.                                                                                                                                                                                 |
| <b>Applications</b>            | Kits ensure exosome isolation and exosome marker characterization via FACS, Exosome comprehensive profiling, User friendly and suitable for multiple marker analyses, No initial exosome purification required, Lyophilized Exosome Standards for positive control included. |
| <b>Storage</b>                 | 4°C                                                                                                                                                                                                                                                                          |
| <b>Shipping</b>                | Gel Pack                                                                                                                                                                                                                                                                     |
| <b>Size</b>                    | 20 reactions                                                                                                                                                                                                                                                                 |
| <b>Kit Components</b>          | ExoPure Reagent; FACS-beads; Primary Antibody; Secondary Antibody; Sample Buffer (1X); Exosome Standards (100 µg)                                                                                                                                                            |
| <b>Target Species</b>          | Cell Media                                                                                                                                                                                                                                                                   |
| <b>Detection method</b>        | FACS Analysis                                                                                                                                                                                                                                                                |
| <b>Features &amp; Benefits</b> | Exosome isolation and exosome marker characterization via FACS                                                                                                                                                                                                               |
