

Recombinant Human DOLK Protein

Cat. No. DOLK-2817H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human DOLK full-length ORF (ADZ15912.1) recombinant protein without tag.
Species	Human
Source	Wheat Germ
Description	The protein encoded by this gene catalyzes the CTP-mediated phosphorylation of dolichol, and is involved in the synthesis of Dol-P-Man, which is an essential glycosyl carrier lipid for C- and O-mannosylation, N- and O-linked glycosylation of proteins, and for the biosynthesis of glycosyl phosphatidylinositol anchors in endoplasmic reticulum. Mutations in this gene are associated with dolichol kinase deficiency.[provided by RefSeq, Apr 2010]
