

Recombinant Human ESPN Protein, GST-tagged

Cat. No. ESPN-3503H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human ESPN full-length ORF (AAI56376.1, 1 a.a. - 854 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	Wheat Germ
Description	This gene encodes a multifunctional actin-bundling protein. It plays a major role in regulating the organization, dimensions, dynamics, and signaling capacities of the actin filament-rich, microvillus-type specializations that mediate sensory transduction in various mechanosensory and chemosensory cells. Mutations in this gene are associated with autosomal recessive neurosensory deafness, and autosomal dominant sensorineural deafness without vestibular involvement. [provided by RefSeq, Nov 2009]
