

## Recombinant Human EVI2A Protein, GST-tagged

**Cat. No.** EVI2A-3545H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                                                                   |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Human EVI2A full-length ORF ( AAH35572, 25 a.a. - 236 a.a.) recombinant protein with GST-tag at N-terminal.                                                                                                                       |
| <b>Species</b>          | Human                                                                                                                                                                                                                             |
| <b>Source</b>           | Wheat Germ                                                                                                                                                                                                                        |
| <b>Description</b>      | EVI2A (Ecotropic Viral Integration Site 2A) is a Protein Coding gene. GO annotations related to this gene include transmembrane signaling receptor activity. An important paralog of this gene is ENSG00000265118.                |
| <b>Molecular Mass</b>   | 49.06 kDa                                                                                                                                                                                                                         |

 45-1 Ramsey Road, Shirley, NY 11967, USA

**Storage** Store at -80 centigrade. Aliquot to avoid repeated freezing and thawing.

**Storage Buffer** 50 mM Tris-HCl, 10 mM reduced Glutathione, pH=8.0 in the elution buffer.

## GENE INFORMATION

**Gene Name** EVI2A ecotropic viral integration site 2A [ Homo sapiens ]

**Official Symbol** EVI2A

**Synonyms** EVI2A; ecotropic viral integration site 2A; EVI2; protein EVI2A; EVDA; ecotropic viral integration site 2A protein homolog; EVI-2A;

**Gene ID** 2123

**mRNA Refseq** NM\_001003927

**Protein Refseq** NP\_001003927

**MIM** 158380

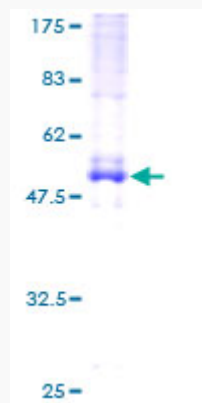

**UniProt ID** P22794

**Quality Control  
Testing**

12.5% SDS-PAGE Stained with Coomassie Blue.
