

Recombinant Human FAM19A2 Protein, GST-tagged

Cat. No. FAM19A2-3731H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human FAM19A2 full-length ORF (BAG53916.1, 1 a.a. - 131 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	Wheat Germ
Description	This gene is a member of the TAFA family which is composed of five highly homologous genes that encode small secreted proteins. These proteins contain conserved cysteine residues at fixed positions, and are distantly related to MIP-1alpha, a member of the CC-chemokine family. The TAFA proteins are predominantly expressed in specific regions of the brain, and are postulated to function as brain-specific chemokines or neurokines, that act as regulators of immune and nervous cells.
