

Dynein Light Chain Dnlc2a

Cat. No. CBCRY31 **Lot. No.** (See product label)

SPECIFICATION

Product Overview

Source	E.coli
Background	The human light chain of the motor protein dynein, Dnlc2A, is also a novel TGF-beta-signaling component, which is altered with high frequency in epithelial ovarian cancer. It is an important mediator of dynein and the development of cancer, owing to its ability to bind to the dynein intermediate light chain (DIC) IC74 and to regulate TGF-beta-dependent transcriptional events.
