

Recombinant Human FCGR3B Protein

Cat. No. FCGR3B-3997H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human FCGR3B (O75015, Met 18 - Gly 193) partial recombinant protein expressed in HEK293 cells.
Species	Human
Source	HEK293
ProteinLength	18-193 a.a.
Description	The protein encoded by this gene is a low affinity receptor for the Fc region of gamma immunoglobulins (IgG). The encoded protein acts as a monomer and can bind either monomeric or aggregated IgG. This gene may function to capture immune complexes in the peripheral circulation. Several transcript variants encoding different isoforms have been found for this gene. A highly-similar gene encoding a related protein is also found on chromosome 1. [provided by RefSeq, Aug 2012]
