

## Recombinant Human DOK3 Protein, MYC/DDK-tagged

Cat. No. DOK3-2479H   Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                                 |
|------------------|-------------------------------------------------------------------------------------------------|
| Product Overview | Recombinant Human DOK3 protein, fused to MYC/DDK-tagged at C-terminus, was expressed in HEK293. |
| Species          | Human                                                                                           |
| Source           | HEK293                                                                                          |
| Form             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.                                           |
| Molecular Mass   | 53.1 kDa                                                                                        |
| Purity           | > 80% as determined by SDS-PAGE and Coomassie blue staining                                     |
| Concentration    | >50 ug/mL as determined by microplate BCA method                                                |

### GENE INFORMATION

|                 |                                         |
|-----------------|-----------------------------------------|
| Gene Name       | DOK3 docking protein 3 [ Homo sapiens ] |
| Official Symbol | DOK3                                    |
| Synonyms        | DOKL; DOKL                              |
| Gene ID         | 79930                                   |
