

## Recombinant Human DPYSL4 Protein, MYC/DDK-tagged

Cat. No. DPYSL4-2531H    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                                   |
|------------------|---------------------------------------------------------------------------------------------------|
| Product Overview | Recombinant Human DPYSL4 protein, fused to MYC/DDK-tagged at C-terminus, was expressed in HEK293. |
| Species          | Human                                                                                             |
| Source           | HEK293                                                                                            |
| Form             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.                                             |
| Molecular Mass   | 61.7 kDa                                                                                          |
| Purity           | > 80% as determined by SDS-PAGE and Coomassie blue staining                                       |
| Concentration    | >50 ug/mL as determined by microplate BCA method                                                  |

### GENE INFORMATION

|                 |                                                    |
|-----------------|----------------------------------------------------|
| Gene Name       | DPYSL4 dihydropyrimidinase-like 4 [ Homo sapiens ] |
| Official Symbol | DPYSL4                                             |
| Synonyms        | CRMP3; DRP-4; ULIP4                                |
| Gene ID         | 10570                                              |
