

## Recombinant Human SPATA25 Protein, MYC/DDK-tagged

**Cat. No.** SPATA25-2580H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                    |
|-------------------------|----------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Human SPATA25 protein, fused to MYC/DDK-tagged at C-terminus, was expressed in HEK293. |
| <b>Species</b>          | Human                                                                                              |
| <b>Source</b>           | HEK293                                                                                             |
| <b>Form</b>             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.                                              |
| <b>Molecular Mass</b>   | 23.7 kDa                                                                                           |
| <b>Purity</b>           | > 80% as determined by SDS-PAGE and Coomassie blue staining                                        |
| <b>Concentration</b>    | >50 ug/mL as determined by microplate BCA method                                                   |

### GENE INFORMATION

|                        |                                                        |
|------------------------|--------------------------------------------------------|
| <b>Gene Name</b>       | SPATA25 spermatogenesis associated 25 [ Homo sapiens ] |
| <b>Official Symbol</b> | SPATA25                                                |
| <b>Synonyms</b>        | C20orf165; dJ337O18.8; TSG23                           |
| <b>Gene ID</b>         | 128497                                                 |
