

Recombinant Human SRPRA Protein, MYC/DDK-tagged

Cat. No. SRPRA-2740H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant Human SRPRA protein, fused to MYC/DDK-tagged at C-terminus, was expressed in HEK293.
Species	Human
Source	HEK293
Description	The gene encodes a subunit of the endoplasmic reticulum signal recognition particle receptor that, in conjunction with the signal recognition particle, is involved in the targeting and translocation of signal sequence tagged secretory and membrane proteins across the endoplasmic reticulum. Alternative splicing results in multiple transcript variants.
Form	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.
Molecular Mass	67 kDa
Purity	> 80% as determined by SDS-PAGE and Coomassie blue staining
Concentration	>50 ug/mL as determined by microplate BCA method

GENE INFORMATION

Gene Name	SRPRA SRP receptor alpha subunit [Homo sapiens]

Official Symbol	SRPRA
Synonyms	DP; Sralpha; SRPR
Gene ID	6734
mRNA Refseq	NM_001177842.1
Protein Refseq	NP_001171313
MIM	182180
