

## Recombinant Human PRR22 Protein, MYC/DDK-tagged

Cat. No. PRR22-3022H    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                                  |
|------------------|--------------------------------------------------------------------------------------------------|
| Product Overview | Recombinant Human PRR22 protein, fused to MYC/DDK-tagged at C-terminus, was expressed in HEK293. |
| Species          | Human                                                                                            |
| Source           | HEK293                                                                                           |
| Form             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.                                            |
| Molecular Mass   | 43.8 kDa                                                                                         |
| Purity           | > 80% as determined by SDS-PAGE and Coomassie blue staining                                      |
| Concentration    | >50 ug/mL as determined by microplate BCA method                                                 |

### GENE INFORMATION

|                 |                                        |
|-----------------|----------------------------------------|
| Gene Name       | PRR22 proline rich 22 [ Homo sapiens ] |
| Official Symbol | PRR22                                  |
| Synonyms        | MGC24975                               |
| Gene ID         | 163154                                 |
