

Recombinant Human AVP Protein, MYC/DDK-tagged

Cat. No. AVP-3033H Lot. No. (See product label)

SPECIFICATION

Product Overview

Recombinant Human AVP protein, fused to MYC/DDK-tagged at C-terminus, was expressed in HEK293.

Species

Human

Source

HEK293

Description

This gene encodes a member of the vasopressin/oxytocin family and preproprotein that is proteolytically processed to generate multiple protein products. These products include the neuropeptide hormone arginine vasopressin, and two other peptides, neurophysin 2 and copeptin. Arginine vasopressin is a posterior pituitary hormone that is synthesized in the supraoptic nucleus and paraventricular nucleus of the hypothalamus. Along with its carrier protein, neurophysin 2, it is packaged into neurosecretory vesicles and transported axonally to the nerve endings in the neurohypophysis where it is either stored or secreted into the bloodstream. The precursor is thought to be activated while it is being transported along the axon to the posterior pituitary. Arginine vasopressin acts as a growth factor by enhancing pH regulation through acid-base transport systems. It has a direct antidiuretic action on the kidney, and also causes vasoconstriction of the peripheral vessels. This hormone can contract smooth muscle during parturition and lactation. It is also involved in cognition, tolerance, adaptation and complex sexual and maternal behaviour, as well as in the regulation of water excretion and cardiovascular functions. Mutations in this gene cause autosomal dominant neurohypophyseal diabetes insipidus (ADNDI). This gene is present in a gene cluster with the related gene oxytocin on chromosome 20.

 45-1 Ramsey Road, Shirley, NY 11967, USA

Form	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.
Molecular Mass	15.3 kDa
Purity	> 80% as determined by SDS-PAGE and Coomassie blue staining
Concentration	>50 ug/mL as determined by microplate BCA method

GENE INFORMATION

Gene Name	AVP arginine vasopressin [Homo sapiens]
Official Symbol	AVP
Synonyms	ADH; ARVP; AVP-NP11; AVRP; VP
Gene ID	551
mRNA Refseq	NM_000490
Protein Refseq	NP_000481
MIM	192340
UniProt ID	P01185
