

Recombinant Human SYT12 Protein, MYC/DDK-tagged

Cat. No. SYT12-3065H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human SYT12 protein, fused to MYC/DDK-tagged at C-terminus, was expressed in HEK293.
Species	Human
Source	HEK293
Description	This gene is a member of the synaptotagmin gene family and encodes a protein similar to other family members that mediate calcium-dependent regulation of membrane trafficking in synaptic transmission. Studies of the orthologous gene in rat have shown that the encoded protein selectively modulates spontaneous synaptic-vesicle exocytosis and may also be involved in regulating calcium independent secretion in nonneuronal cells. Alternative splicing results in multiple transcript variants. The gene has previously been referred to as synaptotagmin XI but has been renamed synaptotagmin XII to be standard with mouse and rat official nomenclature.
Form	25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.
Molecular Mass	46.4 kDa
Purity	> 80% as determined by SDS-PAGE and Coomassie blue staining
Concentration	>50 ug/mL as determined by microplate BCA method

Gene Name	SYT12 synaptotagmin 12 [Homo sapiens]
Official Symbol	SYT12
Synonyms	SYT11; sytXII
Gene ID	91683
mRNA Refseq	NM_001177880.1
Protein Refseq	NP_001171351.1
MIM	606436
UniProt ID	Q8IV01
