

## Recombinant Human CDR2 Protein, His-tagged

Cat. No. CDR2-3169H    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                                                                                                                                                             |
|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Product Overview | Recombinant Human CDR2 protein, fused to His-tagged at N-terminus, was expressed in E. coli.                                                                                                                                |
| Species          | Human                                                                                                                                                                                                                       |
| Source           | E.coli                                                                                                                                                                                                                      |
| Form             | 25 mM Tris, pH 8.0, 150 mM NaCl, 10% glycerol, 1% Sarkosyl. Store at -80 Centigrade. Avoid repeated freeze-thaw cycles. Stable for at least 3 months from receipt of products under proper storage and handling conditions. |
| Molecular Mass   | 51.9 kDa                                                                                                                                                                                                                    |
| Purity           | > 80% as determined by SDS-PAGE and Coomassie blue staining                                                                                                                                                                 |
| Concentration    | >50 ug/mL as determined by microplate BCA method                                                                                                                                                                            |

### GENE INFORMATION

|                 |                                                                        |
|-----------------|------------------------------------------------------------------------|
| Gene Name       | CDR2 cerebellar degeneration-related protein 2, 62kDa [ Homo sapiens ] |
| Official Symbol | CDR2                                                                   |
| Synonyms        | CDR62; Yo                                                              |
