

## Recombinant Human COQ7 Protein, MYC/DDK-tagged

Cat. No. COQ7-3312H    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                                 |
|------------------|-------------------------------------------------------------------------------------------------|
| Product Overview | Recombinant Human COQ7 protein, fused to MYC/DDK-tagged at C-terminus, was expressed in HEK293. |
| Species          | Human                                                                                           |
| Source           | HEK293                                                                                          |
| Form             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.                                           |
| Molecular Mass   | 24.1 kDa                                                                                        |
| Purity           | > 80% as determined by SDS-PAGE and Coomassie blue staining                                     |
| Concentration    | >50 ug/mL as determined by microplate BCA method                                                |

### GENE INFORMATION

|                 |                                                               |
|-----------------|---------------------------------------------------------------|
| Gene Name       | COQ7 coenzyme Q7 homolog, ubiquinone (yeast) [ Homo sapiens ] |
| Official Symbol | COQ7                                                          |
| Synonyms        | CAT5; CLK-1; CLK1                                             |
| Gene ID         | 10229                                                         |
