

Recombinant Human FOXN1 Protein, GST-tagged

Cat. No. FOXN1-4467H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human FOXN1 full-length ORF (AA146540.1, 1 a.a. - 648 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	Wheat Germ
Description	Mutations in the winged-helix transcription factor gene at the nude locus in mice and rats produce the pleiotropic phenotype of hairlessness and athymia, resulting in a severely compromised immune system. This gene is orthologous to the mouse and rat genes and encodes a similar DNA-binding transcription factor that is thought to regulate keratin gene expression. A mutation in this gene has been correlated with T-cell immunodeficiency, the skin disorder congenital alopecia, and nail dystrophy. Alternative splicing in the 5 UTR of this gene has been observed.
