

Recombinant Human FRMPD2 Protein, GST-tagged

Cat. No. FRMPD2-4504H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human FRMPD2 full-length ORF (NP_001017929.1, 1 a.a. - 261 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	Wheat Germ
Description	This gene encodes a FERM and PDZ domain-containing protein and is located in a region of chromosome 10q which contains a segmental duplication resulting in three nearly identical regions. This copy of the gene is full-length and is in the telomeric duplicated region. The exact function of this gene is unknown; however, FERM domains often play a role in signal transduction pathways. Alternatively spliced transcript variants encoding different isoforms have been identified. [provided by RefSeq]
