| <b>Description</b>      | Chondroitin sulfate (CS) is a glycosaminoglycan which is an important structural component of the extracellular matrix and which links to proteins to form proteoglycans. Chondroitin sulfate E (CS-E) is an isomer of chondroitin sulfate in which the C-4 and C-6 hydroxyl groups are sulfated. This gene encodes a type II transmembrane glycoprotein that acts as a sulfotransferase to transfer sulfate to the C-6 hydroxal group of chondroitin sulfate. This gene has also been identified as being co-expressed with RAG1 in B-cells and as potentially acting as a B-cell surface signaling receptor. Alternative splicing results in multiple transcript variants encoding distinct isoforms. [provided by RefSeq, Jul 2012] |
| <b>Molecular Mass</b>   | 87.45 kDa                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

**Applications**

Enzyme-linked Immunoabsorbent Assay  
 Western Blot (Recombinant protein)  
 Antibody Production  
 Protein Array

**Notes**

Best use within three months from the date of receipt of this protein.

**Storage**

Store at -80 centigrade. Aliquot to avoid repeated freezing and thawing.

**Storage Buffer**

50 mM Tris-HCl, 10 mM reduced Glutathione, pH=8.0 in the elution buffer.

## GENE INFORMATION

**Gene Name**

CHST15 carbohydrate sulfotransferase 15 [ Homo sapiens (human) ]

**Official Symbol**

CHST15

**Synonyms**

CHST15; carbohydrate sulfotransferase 15; BRAG; GALNAC4S-6ST; carbohydrate sulfotransferase 15; B cell RAG associated protein (GALNAC4S-6ST); B-cell RAG-associated gene protein; carbohydrate (N-acetylgalactosamine 4-sulfate 6-O) sulfotransferase 15; hBRAG; EC 2.8.2.33

**Gene ID**

51363
