

Recombinant Human GBAS Protein, GST-tagged

Cat. No. GBAS-4770H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human GBAS full-length ORF (1 a.a. - 247 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	Wheat Germ
Description	Chromosomal region 7p12, which contains GBAS, is amplified in approximately 40% of glioblastomas, the most common and malignant form of central nervous system tumor. The predicted 286-amino acid protein contains a signal peptide, a transmembrane domain, and 2 tyrosine phosphorylation sites. The GBAS transcript is expressed most abundantly in heart and skeletal muscle. GBAS protein might be involved in vesicular transport. [provided by RefSeq]
