

Recombinant Human GBGT1 Protein, GST-tagged

Cat. No. GBGT1-4774H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human GBGT1 full-length ORF (AAH32499.1, 1 a.a. - 347 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	Wheat Germ
Description	This gene encodes a member of the histo-blood group ABO gene family that encodes glycosyltransferases with related but distinct substrate specificity. This protein plays a role in synthesizing Forssman glycolipid (FG), a member of the globoseries glycolipid family. Human cells do not normally produce FG but produce the precursor glycolipids globotriaosylceramide and globoside. This protein may be involved in the tropism and binding of pathogenic organisms.
