

Recombinant Human GFAP Protein, GST-tagged

Cat. No. GFAP-4847H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human GFAP full-length ORF (NP_002046.1, 1 a.a. - 432 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	Wheat Germ
Description	This gene encodes one of the major intermediate filament proteins of mature astrocytes. It is used as a marker to distinguish astrocytes from other glial cells during development. Mutations in this gene cause Alexander disease, a rare disorder of astrocytes in the central nervous system. Alternative splicing results in multiple transcript variants encoding distinct isoforms.
