

Recombinant Human PCSK5, GST-tagged

Cat. No. PCSK5-121H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human PCSK5 was produced in vitro wheat germ expression system with GST-tag at N-terminal, 128 kDa (913aa).
Species	Human
Source	Wheat Germ
Description	The protein encoded by this gene belongs to the subtilisin-like proprotein convertase family. The members of this family are proprotein convertases that process latent precursor proteins into their biologically active products. This encoded protein mediates posttranslational endoproteolytic processing for several integrin alpha subunits. It is thought to process prorenin, pro-membrane type-1 matrix metalloproteinase and HIV-1 glycoprotein gp160. Multiple transcript variants encoding different isoforms have been found for this gene.

Purification GlutathioneSepharose 4 Fast Flow

Applications ELISA;WB; Antibody Production; Protein Array

Note Bestuse within three months from the date of receipt of this protein.

StorageBuffer 50 mMTris-HCl, 10 mM reduced Glutathione, pH8.0 in the elution buffer.

Storage Storeat -80°C. Aliquot to avoid repeated freezing and thawing.

OfficialSymbol PCSK5
