

Recombinant Human GRIK5 Protein

Cat. No. GRIK5-5341H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human GRIK5 full-length ORF (AAI68375.1) recombinant protein without tag.
Species	Human
Source	Wheat Germ
Description	This gene encodes a protein that belongs to the glutamate-gated ionic channel family. Glutamate functions as the major excitatory neurotransmitter in the central nervous system through activation of ligand-gated ion channels and G protein-coupled membrane receptors. The protein encoded by this gene forms functional heteromeric kainate-preferring ionic channels with the subunits encoded by related gene family members. [provided by RefSeq]
