

## Recombinant Human C22orf29 Protein, MYC/DDK-tagged

**Cat. No.** C22orf29-1834H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                    |
|-------------------------|----------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant human C22orf29 protein, fused to MYC/DDK-tagged at C-terminus, was expressed in HEK293 |
| <b>Species</b>          | Human                                                                                              |
| <b>Source</b>           | HEK293                                                                                             |
| <b>Form</b>             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.                                              |
| <b>Molecular Mass</b>   | 39.1 kDa                                                                                           |
| <b>Purity</b>           | > 80% as determined by SDS-PAGE and Coomassie blue staining                                        |
| <b>Concentration</b>    | >50 ug/mL as determined by microplate BCA method                                                   |

### GENE INFORMATION

|                        |                                                               |
|------------------------|---------------------------------------------------------------|
| <b>Gene Name</b>       | C22orf29 chromosome 22 open reading frame 29 [ Homo sapiens ] |
| <b>Official Symbol</b> | C22orf29                                                      |
| <b>Synonyms</b>        | BOP; BOP                                                      |
| <b>Gene ID</b>         | 79680                                                         |
