

# Recombinant Human C4orf48 Protein, MYC/DDK-tagged

**Cat. No.** C4orf48-1871H    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                   |
|-------------------------|---------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant human C4orf48 protein, fused to MYC/DDK-tagged at C-terminus, was expressed in HEK293 |
| <b>Species</b>          | Human                                                                                             |
| <b>Source</b>           | HEK293                                                                                            |
| <b>Form</b>             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.                                             |
| <b>Molecular Mass</b>   | 10 kDa                                                                                            |
| <b>Purity</b>           | > 80% as determined by SDS-PAGE and Coomassie blue staining                                       |
| <b>Concentration</b>    | >50 ug/mL as determined by microplate BCA method                                                  |

## GENE INFORMATION

|                        |                                                             |
|------------------------|-------------------------------------------------------------|
| <b>Gene Name</b>       | C4orf48 chromosome 4 open reading frame 48 [ Homo sapiens ] |
| <b>Official Symbol</b> | C4orf48                                                     |
| <b>Synonyms</b>        | CHR4_55; CHR4_55                                            |
| <b>Gene ID</b>         | 401115                                                      |
