

## Recombinant Human RUNDC1 Protein, MYC/DDK-tagged

Cat. No. RUNDC1-2016H    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                                  |
|------------------|--------------------------------------------------------------------------------------------------|
| Product Overview | Recombinant human RUNDC1 protein, fused to MYC/DDK-tagged at C-terminus, was expressed in HEK293 |
| Species          | Human                                                                                            |
| Source           | HEK293                                                                                           |
| Form             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.                                            |
| Molecular Mass   | 67.4 kDa                                                                                         |
| Purity           | > 80% as determined by SDS-PAGE and Coomassie blue staining                                      |
| Concentration    | >50 ug/mL as determined by microplate BCA method                                                 |

### GENE INFORMATION

|                 |                                                 |
|-----------------|-------------------------------------------------|
| Gene Name       | RUNDC1 RUN domain containing 1 [ Homo sapiens ] |
| Official Symbol | RUNDC1                                          |
| Synonyms        | DKFZp761H0421                                   |
| Gene ID         | 146923                                          |
