

## Recombinant Human ERO1A Protein, MYC/DDK-tagged

Cat. No. ERO1A-2225H    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                                 |
|------------------|-------------------------------------------------------------------------------------------------|
| Product Overview | Recombinant human ERO1A protein, fused to MYC/DDK-tagged at C-terminus, was expressed in HEK293 |
| Species          | Human                                                                                           |
| Source           | HEK293                                                                                          |
| Form             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10% glycerol.                                           |
| Molecular Mass   | 54.2 kDa                                                                                        |
| Purity           | > 80% as determined by SDS-PAGE and Coomassie blue staining                                     |
| Concentration    | >50 ug/mL as determined by microplate BCA method                                                |

### GENE INFORMATION

|                 |                                                                     |
|-----------------|---------------------------------------------------------------------|
| Gene Name       | ERO1A endoplasmic reticulum oxidoreductase 1 alpha [ Homo sapiens ] |
| Official Symbol | ERO1A                                                               |
| Synonyms        | ERO1-alpha; ERO1-L; ERO1-L-alpha; Ero1alpha; ERO1L; ERO1LA          |
| Gene ID         | 30001                                                               |
