

Mouse Monoclonal Antibody to Human Sulfotransferase Family 1E, Estrogen-Preferring, Member 1

Cat. No. CAB11607MH **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Mouse Monoclonal Antibody to Human Sulfotransferase Family 1E, Estrogen-Preferring, Member 1
Species	Human
Source	Mouse
Antigen Description	Estrogen sulfotransferase, also known as Sulfotransferase, estrogen-preferring, Sulfotransferase 1E1, SULT1E1 and ST1E1, is a cytoplasm enzyme which belongs to the sulfotransferase 1 family. Sulfotransferase enzymes catalyze the sulfate conjugation of many hormones, neurotransmitters, drugs, and xenobiotic compounds. These cytosolic enzymes are different in their tissue distributions and substrate specificities. SULT1E1 may control the level of the estrogen receptor by sulfurylating free estradiol. SULT1E1 maximally sulfates beta-estradiol and estrone at concentrations of 20 nM. SULT1E1 also sulfates dehydroepiandrosterone, pregnenolone, ethinylestradiol, equalenin, diethylstilbesterol and 1-naphthol, at significantly higher concentrations; however, cortisol, testosterone and dopamine are not sulfated. SULT1E1 is a key enzyme in estrogen homeostasis. It plays a central role in the prevention and development of human disease.
Specificity	Human SULT1E1. No cross-reactivity in ELISA with Human SULT2A1; E.coli cell lysate

Immunogen	Recombinant Human SULT1E1 Protein
Isotype	Mouse IgG1
Clone	5I8F8
Applications	Western blot; ELISA
Dilution	Western blot: This antibody can be used at 1-2 µg/mL with the appropriate secondary reagents to detect Human SULT1E1 in WB. Using a DAB detection system, the detection limit for Human SULT1E1 is approximately 2 ng/lane under non-reducing conditions and 1 ng/lane under reducing conditions. Direct ELISA: This antibody can be used at 0.5-1 µg with the appropriate secondary reagents to detect Human SULT1E1. The detection limit for Human SULT1E1 is approximately 0.078 ng/well.
Preparation	This antibody was produced from a hybridoma resulting from the fusion of a mouse myeloma with B cells obtained from a mouse immunized with purified, human cell-derived, recombinant Human SULT1E1. The IgG fraction of the cell culture supernatant was purified by Protein A affinity chromatography.
Format	0.2 µm filtered solution in PBS with 5% trehalose
Storage	This antibody can be stored at 2-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20 to -70 °C. Preservative-Free. Sodium azide is recommended to avoid contamination (final concentration 0.05%-0.1%). It is toxic to cells and should be disposed of properly. Avoid repeated freeze-thaw cycles.

GENE INFORMATION

Gene Name SULT1E1 sulfotransferase family 1E, estrogen-preferring, member 1 [Homo sapiens]

 Tel: 1-631-559-9269 1-516-512-3133

 Email: info@creative-biomart.com  Fax: 1-631-938-8127

 45-1 Ramsey Road, Shirley, NY 11967, USA

Official Symbol	SULT1E1
Synonyms	SULT1E1; sulfotransferase family 1E, estrogen-preferring, member 1; STE,sulfotransferase, estrogen preferring; estrogen sulfotransferase; EST; sulfotransferase 1E1; estrone sulfotransferase; sulfotransferase, estrogen-preferring; STE; EST-1; ST1E1; MGC34459;
Gene ID	6783
mRNA Refseq	NM_005420
Protein Refseq	NP_005411
MIM	600043
UniProt ID	P49888
Chromosome Location	4q13.1
Pathway	Biological oxidations, organism-specific biosystem; Cytosolic sulfonation of small molecules, organism-specific biosystem; Metabolism, organism-specific biosystem; Phase II conjugation, organism-specific biosystem; Steroid hormone biosynthesis, organism-specific biosystem; Steroid hormone biosynthesis, conserved biosystem; Sulfur metabolism, organism-specific biosystem;
Function	estrone sulfotransferase activity; flavonol 3-sulfotransferase activity; steroid binding; steroid sulfotransferase activity; steroid sulfotransferase activity; transferase activity;
