

Recombinant Human AIP Protein, His-tagged

Cat. No. AIP-510H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human AIP(Ile63~Pro296) fused with His tag at N-terminal was expressed in E. coli.
Species	Human
Source	E.coli
ProteinLength	Ile63~Pro296
Description	The protein encoded by this gene is a receptor for aryl hydrocarbons and a ligand-activated transcription factor. The encoded protein is found in the cytoplasm as part of a multiprotein complex, but upon binding of ligand is transported to the nucleus. This protein can regulate the expression of many xenobiotic metabolizing enzymes. Also, the encoded protein can bind specifically to and inhibit the activity of hepatitis B virus. Three transcript variants encoding different isoforms have been found for this gene.
Form	PBS, pH7.4, containing 0.01% SKL, 1mM DTT, 5% Trehalose and Proclin300.
Molecular Mass	30.4kDa
Endotoxin	<1.0EU per 1ug (determined by the LAL method)
Purity	> 95%
Applications	Positive Control; Immunogen; SDS-PAGE; WB.

If bio-activity of the protein is needed, please check active protein

Stability

The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37 centigrade for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition.

Storage

Avoid repeated freeze/thaw cycles. Store at 2-8 centigrade for one month. Aliquot and store at -80 centigrade for 12 months.

Reconstitution

Reconstitute in PBS or others

GENE INFORMATION

Gene Name

AIP aryl hydrocarbon receptor interacting protein [Homo sapiens]

Official Symbol

AIP

Synonyms

AIP; aryl hydrocarbon receptor interacting protein; AH receptor-interacting protein; ARA9; FKBP16; XAP2; immunophilin homolog ARA9; HBV X-associated protein 2; XAP-2; FKBP37; SMTPHN;

Gene ID

9049

mRNA Refseq
