

# Recombinant Mouse Dgka Protein, His-tagged

**Cat. No.** Dgka-677M    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                                                              |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Mouse Dgka(His305~Arg531) fused with His tag at N-terminal was expressed in E. coli.                                                                                                                                                                                                                                             |
| <b>Species</b>          | Mouse                                                                                                                                                                                                                                                                                                                                        |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                                                                                                                                       |
| <b>ProteinLength</b>    | His305~Arg531                                                                                                                                                                                                                                                                                                                                |
| <b>Form</b>             | 20mM Tris, 150mM NaCl, pH8.0, containing 1mM EDTA, 1mM DTT, 0.01% SKL, 5% Trehalose and Proclin300.                                                                                                                                                                                                                                          |
| <b>Molecular Mass</b>   | 29.1kDa                                                                                                                                                                                                                                                                                                                                      |
| <b>Endotoxin</b>        | <1.0EU per 1ug (determined by the LAL method)                                                                                                                                                                                                                                                                                                |
| <b>Purity</b>           | > 90%                                                                                                                                                                                                                                                                                                                                        |
| <b>Applications</b>     | Positive Control; Immunogen; SDS-PAGE; WB.<br>If bio-activity of the protein is needed, please check active protein                                                                                                                                                                                                                          |
| <b>Stability</b>        | The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37 centigrade for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition. |

|                |                                                                                                                              |
|----------------|------------------------------------------------------------------------------------------------------------------------------|
| <b>Storage</b> | Avoid repeated freeze/thaw cycles. Store at 2-8 centigrade for one month. Aliquot and store at -80 centigrade for 12 months. |
|----------------|------------------------------------------------------------------------------------------------------------------------------|

|                       |                               |
|-----------------------|-------------------------------|
| <b>Reconstitution</b> | Reconstitute in PBS or others |
|-----------------------|-------------------------------|

## GENE INFORMATION

|                  |                                                    |
|------------------|----------------------------------------------------|
| <b>Gene Name</b> | Dgka diacylglycerol kinase, alpha [ Mus musculus ] |
|------------------|----------------------------------------------------|

|                        |      |
|------------------------|------|
| <b>Official Symbol</b> | Dgka |
|------------------------|------|

|                 |                                                                                                                                                                               |
|-----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Synonyms</b> | DGKA; diacylglycerol kinase, alpha; diacylglycerol kinase alpha; DGK-alpha; DAG kinase alpha; diglyceride kinase alpha; 80 kDa diacylglycerol kinase; 80kDa; Dagk1; AW146112; |
|-----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

|                |       |
|----------------|-------|
| <b>Gene ID</b> | 13139 |
|----------------|-------|

|                    |           |
|--------------------|-----------|
| <b>mRNA Refseq</b> | NM_016811 |
|--------------------|-----------|

|                       |           |
|-----------------------|-----------|
| <b>Protein Refseq</b> | NP_058091 |
|-----------------------|-----------|

|                   |        |
|-------------------|--------|
| <b>UniProt ID</b> | O88673 |
