

Recombinant Human HTR3B Protein

Cat. No. HTR3B-5239H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human HTR3B full-length ORF (NP_006019.1) recombinant protein without tag.
Species	Human
Source	Wheat Germ
Description	The product of this gene belongs to the ligand-gated ion channel receptor superfamily. This gene encodes subunit B of the type 3 receptor for 5-hydroxytryptamine (serotonin), a biogenic hormone that functions as a neurotransmitter, a hormone, and a mitogen. This receptor causes fast, depolarizing responses in neurons after activation. It appears that the heteromeric combination of A and B subunits is necessary to provide the full functional features of this receptor, since either subunit alone results in receptors with very low conductance and response amplitude.
