

Recombinant Human HTR4 Protein

Cat. No. HTR4-5238H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human HTR4 full-length ORF (NP_000861.1) recombinant protein without tag.
Species	Human
Source	Wheat Germ
Description	This gene is a member of the family of serotonin receptors, which are G protein coupled receptors that stimulate cAMP production in response to serotonin (5-hydroxytryptamine). The gene product is a glycosylated transmembrane protein that functions in both the peripheral and central nervous system to modulate the release of various neurotransmitters. Multiple transcript variants encoding proteins with distinct C-terminal sequences have been described, but the full-length nature of some transcript variants has not been determined.
