

Recombinant Human IL2RA Protein

Cat. No. IL2RA-5198H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human IL2RA (P01589, Glu 22 - Cys 213) partial recombinant protein expressed in HEK293 cells.
Species	Human
Source	HEK293
ProteinLength	22-213 a.a.
Description	The interleukin 2 (IL2) receptor alpha (IL2RA) and beta (IL2RB) chains, together with the common gamma chain (IL2RG), constitute the high-affinity IL2 receptor. Homodimeric alpha chains (IL2RA) result in low-affinity receptor, while homodimeric beta (IL2RB) chains produce a medium-affinity receptor. Normally an integral-membrane protein, soluble IL2RA has been isolated and determined to result from extracellular proteolysis. Alternately-spliced IL2RA mRNAs have been isolated, but the significance of each is presently unknown. [provided by RefSeq]
