

Recombinant Human ITGA6 Protein

Cat. No. ITGA6-4995H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human ITGA6 full-length ORF (NP_000201.2) recombinant protein without tag.
Species	Human
Source	Wheat Germ
Description	The ITGA6 protein product is the integrin alpha chain alpha 6. Integrins are integral cell-surface proteins composed of an alpha chain and a beta chain. A given chain may combine with multiple partners resulting in different integrins. For example, alpha 6 may combine with beta 4 in the integrin referred to as TSP180, or with beta 1 in the integrin VLA-6. Integrins are known to participate in cell adhesion as well as cell-surface mediated signalling. Two transcript variants encoding different isoforms have been found for this gene.
