

# Recombinant Human KLRA1P Protein, GST-tagged

**Cat. No.** KLRA1P-4921H    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                           |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Human KLRA1 full-length ORF ( AAH69734.1, 1 a.a. - 215 a.a.) recombinant protein with GST-tag at N-terminal.                                                                                                                              |
| <b>Species</b>          | Human                                                                                                                                                                                                                                     |
| <b>Source</b>           | Wheat Germ                                                                                                                                                                                                                                |
| <b>Description</b>      | KLRA1P (Killer Cell Lectin Like Receptor A1, Pseudogene) is a Pseudogene. Among its related pathways are Immune response Role of DAP12 receptors in NK cells.                                                                             |
| <b>Molecular Mass</b>   | 51.9 kDa                                                                                                                                                                                                                                  |
| <b>AA Sequence</b>      | MNDQGEIYSTLRFLQSPSESQNRLRPDDTQRP GKTD DKEFSVPWHLIAVTLGILCLL<br>LLMIVTVLVTNIFQCIQEKHQ RQEILRNCSEKYIMQNDNYLKEQILT NKT LKYDVLKNS<br>FQ QKKELDSRLIQKNRCHRENEIVFKVLQNTGKFSEDHGSCCGVNCYYFTMQKKD<br>WKGCKQTCQHCRSSLLKIDDKDELVFYIHFYSLGLCFSMLDLRY |
| <b>Applications</b>     | Enzyme-linked Immunoabsorbent Assay<br>Western Blot (Recombinant protein)<br>Antibody Production<br>Protein Array                                                                                                                         |
| <b>Notes</b>            | Best use within three months from the date of receipt of this protein.                                                                                                                                                                    |
| <b>Storage</b>          | Store at -80 centigrade. Aliquot to avoid repeated freezing and thawing.                                                                                                                                                                  |

**Storage Buffer** 50 mM Tris-HCl, 10 mM reduced Glutathione, pH=8.0 in the elution buffer.

## GENE INFORMATION

**Gene Name** KLRA1P killer cell lectin like receptor A1, pseudogene [ Homo sapiens (human) ]

**Official Symbol** KLRA1P

**Synonyms** KLRA1P; killer cell lectin like receptor A1, pseudogene; Ly49; KLRA1; LY49L; KLRAP1; Ly-49L; killer cell lectin-like receptor subfamily A pseudogene 1; killer cell lectin-like receptor subfamily A, member 1, pseudogene

**Gene ID** 10748

**MIM** 604274

**Quality Control Testing**

12.5% SDS-PAGE Stained with Coomassie Blue
