

Recombinant Human RPS14P3 Protein, GST-tagged

Cat. No. RPS14P3-4761H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human LOC644068 full-length ORF (XP_935199.1, 1 a.a. - 170 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	Wheat Germ
Description	This gene is one of the multiple ribosomal protein S14-like genes that are dispersed throughout the genome. This gene is intronless, and may possibly be a pseudogene and/or a null allele of the spliced and functional ribosomal protein S14 gene that is located on chromosome 5. This intronless gene is transcribed and has the potential to encode a protein similar to ribosomal protein S14, but it is unclear as to whether or not a protein is produced. [provided by RefSeq]
