

Recombinant Human LPAL2 Protein, GST-tagged

Cat. No. LPAL2-4728H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human LPAL2 full-length ORF (AAI66644.1, 1 a.a. - 132 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	Wheat Germ
Description	Apolipoprotein(a) is the distinguishing protein moiety of lipoprotein(a), of which elevated plasma levels are correlated with an increased risk of atherosclerosis. This gene is similar to the lipoprotein, Lp(a) gene, but all transcripts produced by this gene contain a truncated open reading frame and are candidates for nonsense-mediated decay. Consequently, this gene is considered to be a pseudogene. Alternative splicing results in multiple transcript variants. [provided by RefSeq]
