

## Recombinant Human LYRM2 Protein, GST-tagged

**Cat. No.** LYRM2-4541H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                   |
|-------------------------|-------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Human LYRM2 full-length ORF (BAG34889.1, 1 a.a. - 88 a.a.) recombinant protein with GST-tag at N-terminal.        |
| <b>Species</b>          | Human                                                                                                             |
| <b>Source</b>           | Wheat Germ                                                                                                        |
| <b>Description</b>      | LYRM2 (LYR Motif Containing 2) is a Protein Coding gene.                                                          |
| <b>Molecular Mass</b>   | 36.08 kDa                                                                                                         |
| <b>AA Sequence</b>      | MAASRLPPATLTLKQFVRRQQVLLLYRRILQTIRQVPNDSDRKYLEWAREEFRRNK<br>SATEEDTIRMMITQGNMQLKELEKTLALAKS                       |
| <b>Applications</b>     | Enzyme-linked Immunoabsorbent Assay<br>Western Blot (Recombinant protein)<br>Antibody Production<br>Protein Array |
| <b>Notes</b>            | Best use within three months from the date of receipt of this protein.                                            |
| <b>Storage</b>          | Store at -80 centigrade. Aliquot to avoid repeated freezing and thawing.                                          |
| <b>Storage Buffer</b>   | 50 mM Tris-HCl, 10 mM reduced Glutathione, pH=8.0 in the elution buffer.                                          |

## GENE INFORMATION

|                 |                                                                          |
|-----------------|--------------------------------------------------------------------------|
| Gene Name       | LYRM2 LYR motif containing 2 [ Homo sapiens (human) ]                    |
| Official Symbol | LYRM2                                                                    |
| Synonyms        | LYRM2; LYR motif containing 2; DJ122O8.2; LYR motif-containing protein 2 |
| Gene ID         | 57226                                                                    |
| mRNA Refseq     | NM_020466                                                                |
| Protein Refseq  | NP_065199                                                                |
| UniProt ID      | Q9NU23                                                                   |
