

Recombinant Human MDFI Protein, GST-tagged

Cat. No. MDFI-4504H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human MDFI full-length ORF (NP_005577.1, 1 a.a. - 246 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	Wheat Germ
Description	This protein is a transcription factor that negatively regulates other myogenic family proteins. Studies of the mouse homolog, I-mf, show that it interferes with myogenic factor function by masking nuclear localization signals and preventing DNA binding. Knockout mouse studies show defects in the formation of vertebrae and ribs that also involve cartilage formation in these structures. [provided by RefSeq]
