

## Recombinant Human S100A7L2 Protein, MYC/DDK-tagged

Cat. No. S100A7L2-232H    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                                  |
|------------------|--------------------------------------------------------------------------------------------------|
| Product Overview | Recombinant human S100A7L2 protein, fused to MYC/DDK-tag at C-terminal, was expressed in HEK293. |
| Species          | Human                                                                                            |
| Source           | HEK293                                                                                           |
| Form             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.                                           |
| Molecular Mass   | 12.3 kDa                                                                                         |
| Purity           | > 80% as determined by SDS-PAGE and Coomassie blue staining                                      |
| Concentration    | >50 ug/mL as determined by microplate BCA method                                                 |

### GENE INFORMATION

|                 |                                                         |
|-----------------|---------------------------------------------------------|
| Gene Name       | S100 calcium binding protein A7 like 2 [ Homo sapiens ] |
| Official Symbol | S100A7L2                                                |
| Synonyms        | S100a7b; S100a7b                                        |
| Gene ID         | 645922                                                  |
