

## Recombinant Human KHDC1L Protein, MYC/DDK-tagged

**Cat. No.** KHDC1L-405H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                |
|-------------------------|------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant human KHDC1L protein, fused to MYC/DDK tag at C-terminus, was expressed in HEK293. |
| <b>Species</b>          | Human                                                                                          |
| <b>Source</b>           | HEK293                                                                                         |
| <b>Form</b>             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.                                         |
| <b>Molecular Mass</b>   | 14.4 kDa                                                                                       |
| <b>Purity</b>           | > 80% as determined by SDS-PAGE and Coomassie blue staining                                    |
| <b>Concentration</b>    | >50 ug/mL as determined by microplate BCA method                                               |

### GENE INFORMATION

|                        |                                                              |
|------------------------|--------------------------------------------------------------|
