

## Recombinant Human OSER1 Protein, MYC/DDK-tagged

Cat. No. OSER1-456H    Lot. No. (See product label)

### SPECIFICATION

|                  |                                                                                               |
|------------------|-----------------------------------------------------------------------------------------------|
| Product Overview | Recombinant human OSER1 protein, fused to MYC/DDK tag at C-terminus, was expressed in HEK293. |
| Species          | Human                                                                                         |
| Source           | HEK293                                                                                        |
| Form             | 25 mM Tris.HCl, pH 7.3, 100 mM glycine, 10 % glycerol.                                        |
| Molecular Mass   | 31.6 kDa                                                                                      |
| Purity           | > 80% as determined by SDS-PAGE and Coomassie blue staining                                   |
| Concentration    | >50 ug/mL as determined by microplate BCA method                                              |

### GENE INFORMATION

|                 |                                                            |
|-----------------|------------------------------------------------------------|
| Gene Name       | oxidative stress responsive serine rich 1 [ Homo sapiens ] |
| Official Symbol | OSER1                                                      |
| Synonyms        | C20orf111; dJ1183I21.1; HSPC207; Osr1; Perit1              |
| Gene ID         | 51526                                                      |
