

Recombinant Human LMCD1 Protein, His-tagged

Cat. No. LMCD1-558H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant human LMCD1 protein, fused to His tag at C-terminus and N-terminus, was expressed in E. coli.
Species	Human
Source	E.coli
Description	This gene encodes a member of the LIM-domain family of zinc finger proteins. The encoded protein contains an N-terminal cysteine-rich domain and two C-terminal LIM domains. The presence of LIM domains suggests involvement in protein-protein interactions. The protein may act as a co-regulator of transcription along with other transcription factors. Alternate splicing results in multiple transcript variants of this gene. [provided by RefSeq, May 2013].
Form	Supplied as a 0.2 μM filtered solution of PBS, pH 7.4
Molecular Mass	44kD
Purity	>95% as determined by SDS-PAGE and Coomassie blue staining
