

## Recombinant Human ZNF500 Protein, His-tagged

**Cat. No.** ZNF500-576H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                                                                              |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant human ZNF500 protein, fused to His tag at N-terminus, was expressed in E. coli.                                                                                                                                  |
| <b>Species</b>          | Human                                                                                                                                                                                                                        |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                       |
| <b>Description</b>      | May be involved in transcriptional regulation. [UniProtKB/Swiss-Prot Function]                                                                                                                                               |
| <b>Form</b>             | 25 mM Tris, pH 8.0, 150 mM NaCl, 10 % glycerol, 1 % Sarkosyl Store at -80 centigrade. Avoid repeated freeze-thaw cycles. Stable for at least 3 months from receipt of products under proper storage and handling conditions. |
| <b>Molecular Mass</b>   | 53.5 kDa                                                                                                                                                                                                                     |
| <b>Purity</b>           | > 80% as determined by SDS-PAGE and Coomassie blue staining                                                                                                                                                                  |
| <b>Concentration</b>    | >50 ug/mL as determined by microplate BCA method                                                                                                                                                                             |

### GENE INFORMATION

|                        |                                         |
|------------------------|-----------------------------------------|
| <b>Gene Name</b>       | zinc finger protein 500[ Homo sapiens ] |
| <b>Official Symbol</b> | ZNF500                                  |
