

## Recombinant Human ZNF561 Protein, GST/His-tagged

**Cat. No.** ZNF561-578H    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                               |
|-------------------------|---------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant human ZNF561 protein, fused to GST at N-terminus and His at C-terminus, was expressed in E. coli. |
| <b>Species</b>          | Human                                                                                                         |
| <b>Source</b>           | E.coli                                                                                                        |
| <b>Description</b>      | May be involved in transcriptional regulation. [UniProtKB/Swiss-Prot Function]                                |
| <b>Form</b>             | 25 mM Tris, pH 8.0, 150 mM NaCl, 10 % glycerol, 1 % Sarkosyl.                                                 |
| <b>Molecular Mass</b>   | 74.9 kDa                                                                                                      |
| <b>Purity</b>           | > 80% as determined by SDS-PAGE and Coomassie blue staining                                                   |
| <b>Concentration</b>    | >50 ug/mL as determined by microplate BCA method                                                              |

### GENE INFORMATION

|                        |                                         |
|------------------------|-----------------------------------------|
| <b>Gene Name</b>       | zinc finger protein 561[ Homo sapiens ] |
| <b>Official Symbol</b> | ZNF561                                  |
| <b>Synonyms</b>        | MGC45408                                |
