

Recombinant Human ZNF473 Protein, His-tagged

Cat. No. ZNF473-582H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human ZNF473 protein, fused to His tag at N-terminus, was expressed in E. coli.
Species	Human
Source	E.coli
Description	This gene encodes a member of the Krueppel C2H2-type zinc-finger family of proteins. The encoded protein, a component of the U7 snRNP complex, plays a role in histone 3'-end pre-mRNA processing and may be required for cell cycle progression to S phase. Expression level and methylation status of this gene may be correlated with bone mineral density. [provided by RefSeq, Jul 2016].
Form	50 mM Tris, pH 8.0, 8 M Urea.
Molecular Mass	100 kDa
Purity	> 80% as determined by SDS-PAGE and Coomassie blue staining
Concentration	>50 ug/mL as determined by microplate BCA method

GENE INFORMATION

Gene Name	zinc finger protein 473[Homo sapiens]
